EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Silverman on 13 March 2006.

The application has been amended as follows:

In the Claims:

Claim 1, last line, after "atoms" insert --and subjecting the contacted sulfide ore to flotation--;

Notes

The preamble of claim 1 recites a process for flotation, which then becomes a required step of the claim.

The following is an examiner's statement of reasons for allowance:
The closest prior art of record is DE 3629269 in which compound II, which is consistent with the formula compound of instant claim 1, is reacted to

form a second compound I. The second compound I which is noted by DE '269 to have collector properties for sulfide minerals is chemically different from compound II and is not consistent with the formula compound of instant claim 1. Further there is no teaching or suggestion of the prior art that formula II, the starting material for the creation of formula I in DE '269, should be employed in the flotation of sulfide minerals as recited in the claims.
